

BAUMANN SPRINGS Hot Coiled Quality Springs

Advantages of BAUMANN SPRINGS compression springs

- 125 years experience of manufacturing hot coiled springs
- Reliable processes and people assure highest quality demands from sampling to production
- Great flexibility in deliveries due to large material stock and short change over time

Application areas

- Valve Springs for large Diesel Engines, e.g Marine, Power Generation, Locomotives
- Construction machines, Railways, Metros, Trams
- Elements of vibration control, clamping and holding fixtures
- Springs for electrical switches or any other demanding application

Materials

- Bar stock material in any alloys to technical specifications
- Material from dia 10 - 60 mm and flat material max. 12mm/120mm

Manufacturing technology

- Optimized machines and highly rationalized processes
- Hot and cold setting process, modern 100 % crack detection machine
- Surface treatments for long term corrosion protection
- Customized packing solutions
